Building Serv. Eng. Res. Technol. 12(1) 1–23 (1991) Printed in Great Britain

Building Services Engineering Research and Technology

Cumulative Index for Volumes 1–11 (1980–1990)

General Notes

The titles of papers are indexed in full in the natural order of the words, with cross-indexing, if necessary, under keywords. In cross-indexing the longer titles are shortened.

Letters are indexed under Correspondence, under the appropriate subject, and under author. Letters relating to a paper are indexed with the subject of the paper.

The Subject Index gives the names of all authors of multiple-author papers and the first and last pages of each paper. Book reviews are included. Buildings and plants described are listed under Case Studies.

Errata are given in both indexes.

The Author Index gives the names of all authors. With multiple-author papers only one name is given at a time, but the names of the other authors can be found by reference to the Subject Index.

Subject Index

Title	*Author*	*Vol.*	*No.*	*Pages*	*Year*
A					
Aberporth. CIBS Example Weather Year for		5	3	126–127	1984
Accumulation and separation of gases in central heating systems	J Jelinek & N R Chapman	1	3	135–139	1980
Addition of a condensation model to BREDEM, Condensation risk prediction:	D Boyd, P Cooper & T Oreszczyn	9	3	117–125	1988
Adiabatic saturation temperature of air: Practical application	D Fitzgerald	9	3	137–138	1988
Admittance method, Calculation of peak temperatures in multiple zones using the	M R Dow	6	2	63–66	1985
Admittance method to calculate energy consumption, Using the	J R Waters	2	4	181–187	1981
Admittance of a deep sheet of water (Correspondence)	P Doyle & D Fitzgerald	4	1	33	1983
Aerated concrete, Effect of moisture on the thermal conductivity of	A D Stuckes & A Simpson	6	2	49–53	1985
Aggregate concrete, Effect of moisture on the thermal conductivity of lightweight	A D Stuckes, J A Tinker & A Simpson	7	1	27–32	1986
Air-conditioned rooms, air flow pattern in,	P Nielsen	1	4	199–203	1980
Air conditioning, Latent thermal storage for	D Arnold	8	4	97–103	1987
Air conditioning for a rehabilitated London landmark	T Smith	3	1	13–29	1982
Air conditioning of museums and art galleries	A Reading	4	3	97–105	1983
Air conditioning systems, Predicted energy consumption in	D Oughton	1	4	189–198	1980
Airflow measurement between three connected cells	C Irwin & R E Edwards	8	4	91–96	1987
Air flow pattern in air-conditioned rooms, Influence of ceiling-mounted obstacles on the	P Nielsen	1	4	199–203	1980
Air flows between two zones: Accuracy of single tracer gas measurements for estimation	S B Riffat	10	2	85–88	1989
Air flows through cracks between building components, Measurement of	P T McGrath & A T Howarth	5	2	43–48	1984
Airflows using a rapid response tracer gas technique, Measurement of	C Irwin, R E Edwards & A T Howarth	6	4	146–152	1985
Airflow systems noise, Computer-aided analysis of	T K Willson & A Iqbal	1	1	54–57	1980
Airflow through asymmetric building cracks	P H Baker, S Sharples & I C Ward	7	3	107–108	1986
Airflow through perforated screens at small pressure differences	P H Baker, R D Heap & S Sharples	7	2	96–97	1986
Air heat pumps in building ventilation systems, Plate recuperators used with air	H R Olsen	9	3	99–104	1988
Air infiltration and ventilation in relation to the thermal performance of dwelling houses in Poland	M B Nantka	7	1	11–18	1986
Air injection into rooms, the isothermal ceiling jet	C S Sidaway, G P Hammond & S D Probert	1	2	63–70	1980
Errata		1	4	214	1980
Air leakage characteristics of houses—a new approach	D W Etheridge	5	1	32–36	1984
Air leakage measurements on full-scale construction	P Baker & G Valentine	8	3	6971	1987
Air moisture content: Dynamic effects of ventilation vapour generation, Room	K M Letherman	9	2	49–52	1988
Air movement in a partitioned industrial environment	A C Pitts	8	2	33–37	1987
Air movement model, Time lags in a two-zone	J R Waters	8	2	43–46	1987
Air movement models?, How accurate are the predictions of complex	M J Holmes & G E White	8	2	29–31	1987

© 1991 The Chartered Institution of Building Services Engineers

Title	Author	Vol.	No.	Page	Year
Air pressures, Psychometry: Use of standard charts for non-standard	I J G Berry	11	2	73–75	1990
Air quality, Olf and decipol: New units for perceived	P O Fanger	9	4	155–157	1988
Air speed on thermal performance, Loft insultants: Effect of	A Simpson, A D Stuckes & M Napora	9	4	159–166	1988
Air temperature?, What is	D Fitzgerald	6	4	179–180	1985
Air temperature variations in naturally ventilated rooms with convective heating, Prediction of	A T Howarth	6	4	169–175	1985
Air volume system, Comparison of variable pitch fans and variable speed fans in a variable	C M Johnson	9	3	89–98	1988
Algorithms, Empirical and theoretical optimum start	N Murdoch, J M Penman & G J Levermore	11	3	97–103	1990
Algorithms, Internal long-wave radiation exchange in buildings: Comparison of calculation methods: I Review of	P Stefanizzi, A Wilson & A Pinney	11	3	81–85	1990
Algorithms, Internal long-wave radiation exchange in buildings: Comparison of calculation methods: II Testing of	P Stefanizzi, A Wilson & A Pinney	11	3	87–96	1990
Algorithms for estimating hourly solar irradiation on slopes	T Muneer	10	2	81–83	1989
Analysis of the factors affecting energy use in the commercial buildings of the Wellington CBD	G Baird, M R Donn & F Pool	6	2	67–81	1985
Analysis of the integrated HVAC system	S Sviac & I Galaso	3	4	193–199	1982
Analytical methods for thermostat on-off controls	K M Letherman	1	1	31–34	1980
Applicability of conventional vapour permeability values, Interstitial condensation:	R C McLean & G H Galbraith	9	1	29–34	1988
Application of the building services industry, Expert systems: Their	A Dunn	8	4	73–77	1987
Application of the constant concentration technique for ventilation measurement in large buildings	D W Etheridge & R J Stanway	6	3	129–133	1985
Appraisal of available basic design data for building services for the developing world	D W Wood	5	1	18–27	1984
Appraisal techniques for methods of calculating the thermal performance of buildings	D Bloomfield	6	1	13–20	1985
Areas in heat loss calculations	J B Siviour	6	3	134–136	1985
Assessment of *U*-values for insulated roofs	B R Anderson	1	3	119–122	1980
Assessment of the calculation methods to determine the thermal performance of slotted building blocks	K W Garrett	1	1	24–30	1980
Audit Commission yardstick, Intraregional temperature variation and the	J M Penman	10	4	163–165	1989
Availability of a weather suitable for calibration in the UK, Passive solar houses:	R J Kowe & C J Gibbons	9	3	127–132	1988
B					
Background to forthcoming revision, CIBSE Technical Memorandum No. 4: CIBSE design notes for the Middle East—	D W Wood	9	2	41–47	1988
Basis for the revision of scales for sanitary accommodation in schools, A	P J Davidson & R G Courtney	1	1	17–23	1980
'Bin' method—A procedure for predicting seasonal energy requirements in buildings	K M Letherman, J Dewsbury & G Birch	7	2	55–64	1986
Blocks, composite, Method of deriving the thermal resistance of		1	4	211–213	1980
Blocks, slotted building, Assessment of the calculation methods to determine the thermal performance of	K W Garrett	1	1	24–30	1980
Boiler heat load for district heating schemes, The prediction of	W L Marks	1	4	185–188	1980
Boiler plant for the heating of commercial premises, Selection of gas-fired	J R Pattison & V Sharma	1	1	10–16	1980
Boiler plant operations, Use of thermal storage to improve commercial	N M Gibson, J R Pattison & G F Wright	6	4	139–145	1985
Boilers, high efficiency gas, disposal of aqueous condensate from	G J Hardwick & J R Pattison	5	1	1–5	1984
Book reviews					
101 ways to improve energy efficiency		6	6	168	1985
ACEC Report (1982)		3	1	44	1982
ASHRAE Handbook—Fundamental (1981)		2	4	193	1981
Air contamination control in hospitals (1978)	J R Luciano	1	1	58	1980
Air pollution—technology and the environment No. 12, Japan, USA, and USSR (1983)		5	1	37	1984
Application of ambient energy in buildings (1983)	ed. A Sherratt	5	4	176	1984
Applied air conditioning and refrigeration (1980)	C T Gosling	1	3	160	1980
Applied solar energy (1980)	D Kut & G Hare	1	3	161	1980
Automatic control for heating and air conditioning (1981)	K M Letherman	3	1	44	1982
Boiler efficiency and safety (1981)	ed. W S Robertson	4	2	72	1983
British Standard glossary of refrigeration, heating, ventilating, and air conditioning terms (1984)		5	1	37	1984
Building Regulations (2nd amendment) (1981)		2	4	193	1981
Building energy management conventional and solar approaches (1980)	ed. E Fernandes *et al*	2	2	105	1981
Building for energy conservation (1978)	P W O'Callaghan	1	1	58	1980
Building regulations and health	D C Mant & J A Muir	8	4	105	1987
Buildings, energy and climate (1980)	T A Markus & E N Morris	1	3	160	1980
Building services engineering—a review of its development (1982)	N S Billington & B M Roberts	3	3	141	1982
Building services equipment (1980)	F Hall	1	3	161	1980
Building services integration (1983)	P K Barton	4	4	163	1983
Building services thesaurus (1983)	BSRIA	5	1	37	1984
Buildings for music (1985)	M Forsyth	7	2	99	1986
Design primer for hot climates (1980)	A Konya	3	2	90	1982
Development in environmental control and public health (1979)	ed. A Porteous	1	2	115	1980
District heating and cooling for energy conservation (1981)	R E Diament & D Kut	2	4	193	1981
Economic thickness for industrial insulation (1983)	US Dept. Energy	4	4	164	1983

Title	*Author*	*Vol.*	*No.*	*Pages*	*Year*
Energy efficiency demonstration scheme (1984)	Energy Efficiency Office	5	4	175	1984
Energy management systems in buildings (1984)	P Gardner	5	4	175	1984
Energy managers handbook (1980)	G A Payne	2	2	105	1981
Environmental science (1983)	B J Smith, G M Phillips & M Sweeny	4	2	72	1983
Essential building services and equipment (1988)	Hall	10	1	49	1989
Experience of energy conservation in buildings (1981)	ed. A F C Sherratt	3	2	91	1982
Flushing and chemical cleaning water systems (1984)	T Finch	5	3	128	1984
Fuel economy handbook (1980)	NIFES	1	2	115	1980
Guide to home heating costs (1983)	Energy Efficiency Office	5	1	38	1984
Hazardous building materials: a guide to the selection of alternatives (1986)	S R Curwell & C G March	9	3	139	1988
Heating, ventilating, refrigeration and air conditioning year book (1983)		4	4	164	1983
Heating and air conditioning of buildings (1979)	J R Kell & P Martin	1	1	58	1980
Heat pumps (1979)	R D Heap	1	1	58	1980
Heat pumps and air circulation in conditioned spaces	Int. Inst. Refrig.	5	1	38	1984
Hypothermia: the facts (1983)	K J Collins	4	4	163	1983
Keeping warm—for half the cost (1981)	J Colesby & P Townsend	3	1	45	1982
Literature survey and design study of fume cupboards (1980)	D Hughes	3	2	90	1982
Nuclear energy—a professional assessment (1984)	Watt Committee	5	1	37	1984
Passive solar heating design (1980)	R M Lebans	1	3	161	1980
Planned maintenance for productivity and energy conservation (1983)	J W Criswell	5	1	38	1984
Plumbing: Cold water supplies, drainage and sanitation (1986)	F Hall	10	4	167	1989
Plumbing and heating calculations (1982)	F Hall	4	4	163	1983
Practical building services design, Vol 1 (1983)	K Fowler	5	2	87	1984
Refrigeration and air conditioning (1981)	A R Trott	3	1	44	1982
Saving of energy in refrigeration (1980)	Int.Inst.Refrig.	2	2	105	1981
Savings by automatic control of heating, ventilating and air conditioning systems (1983)	Dansk VVS	4	2	72	1983
Solar energy at high latitudes (1985)	ed K MacGregor	9	3	139	1988
Solar energy in buildings (1979)	C Chauliaguet, P Baratsabal & J P Batellier	1	2	115	1980
Solar failure (1981)	K Lee & L Donnelly	4	2	73	1981
Solar heating of domestic hot water (1981)	Atkins Research	3	2	90	1982
Super solar houses (1983)	W A Shurcliff	5	1	38	1984
Taking the plunge—product directory to pools (1983)		5	1	38	1984
Tewkesbury Borough Council external wall insulation applied to houses (1984)	BRECSU	5	4	175	1984
Thermal energy conservation—building and services design (1981)	J A Weller & A Youle	2	4	193	1981
Toxicity of ozone (1979)	D Hughes	1	2	115	1980
Tropical refrigeration and air conditioning (1984)	L W Cottell & S Olarewaju	5	3	128	1984
Unvented hot water systems (1984)	D Gregory	5	3	128	1984

End of book reviews					
BREDEM, Condensation risk prediction: Addition of a condensation model to	D Boyd, P Cooper & T Oreszczyn	9	3	117–125	1988
BREDEM—The BRE domestic energy model: Testing the predictions of a three-zone version	G Henderson & L D Shorrock	7	2	87–91	1986
BRE Low Energy Office—five years on	R W John & A C Salvidge	7	4	121–128	1986
BRE 'low energy' building		3	3	127–133	19 8
Bracknell, CIBSE Example Weather Year for		7	1	47–48	1986
Building, The BRE 'low energy'		3	3	127–133	1982
Building and building research, Computers in buildings,	R N Wright	6	1	21–27	1985
Building control systems: Fuzzy rule-based approach to performance assessment	A L Dexter & D W Trewhella	11	4	115–124	1990
Building design, The role of feedback in	D J Croome	1	1	1–9	1980
Building energy needs and window area	G T McKennan	6	2	54–62	1985
Building environmental engineering higher education	D J Croome, R Shields & P Wild	2	1	27–36	1981
Building heat loss calculations: Choice of internal temperature and of heat exchange coefficient h_i	J Uyttenbroeck	11	2	49–56	1990
Building heat needs, parameters for	M G Davies	3	4	181–188	1982
Building materials, measurement of moisture levels in	A Bogle, J T McMullan & R Morgan	4	3	77–83	1983
Buildings, Commercial, The consumption of hot water in	P G Jones	3	3	95–109	1982
Errata		3	4	151	1982
Buildings, Noise measurements in	A J Jones	9	1	35–38	1988
Buildings, Optimum shape of (Correspondence)	D Fitzgerald	3	1	43	1982
Buildings, local authority, Energy auditing in	P M Freeman, S A Harrison & G M Mills	5	2	60–62	1984
Building services, Integration and co-ordination of	S R Danton	1	3	128–134	1980
Building services, Integration and co-ordination of	A Michie	2	1	15–26	1981
Correspondence	A Michie	2	3	148	1981
Building services, Intelligent controls for	R W John & A L Dexter	10	4	131–141	1989
Building services contractors, The flexibility of	P Lansley	3	2	49–55	1982
Building services engineering, Suggested topics for research in		10	4	161	1989
Building services engineering—The invisible architecture	D J Croome	11	1	27–31	1990
Building services for the developing world, basic design data for	D W Wood	5	1	18–27	1984
Building services industry, Expert systems: Their application of the	A Dunn	8	4	73–77	1987
Buildings for persons, Designing	D I Williams	4	1	6–10	1983

C

Calculating the thermal performance of buildings, Appraisal techniques for methods of	D Bloomfield	6	1	13–20	1985
Calculation of energy use in dwellings	C E Uglow	2	1	1–14	1981
Calculation of peak temperatures in multiple zones using the admittance method	M R Dow	6	2	63–66	1985

Title	*Author*	*Vol.*	*No.*	*Pages*	*Year*
Calculations: Choice of internal temperature and of heat exchange coefficient h_i, Building heat loss	J Uyttenbroeck	11	2	49–56	1990
Capacity control of a refrigeration system using a variable speed compressor	A K H Wong & R W James	9	2	63–68	1988
Capacity index and velocity pressure factors	F Evans	2	4	191–192	1981
Errata		3	1	43	1982
Carbon dioxide concentration, Control of ventilation as a function of indoor	B F Warren	3	1	4–12	1982
Case study of a Middle Eastern building	R E Tully	3	2	75–87	1982

Case Studies

Alexandra Road housing scheme, Sth Hampstead, London, NW8		1	2	93–105	1980
BRE 'low energy' building, Building Research Establishment, Garston, Watford, Herts.		3	3	127–133	1982
Clacton St. John's Primary School, Clacton, Essex		5	2	63–80	1984
Coutts Bank, Charing Cross, London		3	1	13–29	1982
Fenland House Hospital, Peterborough		5	1	6–17	1984
Huddersfield Polytechnic, Huddersfield		2	2	83–85	1981
National Westminster Tower, London		3	2	56–60	1982
Sharjah Internatonal Airport, United Arab Emirates		3	2	75–87	1982
Swimming pool hall		2	3	133–136	1981
End of case studies					
CIBSE Algorithm 2: Solar geometry	P Petherbridge	7	1	53	1986
CIBSE Engineering Practice Committee: Supplementary list of research topics		7	2	98–99	1986
CIBSE Example Weather Year for Bracknell		7	1	47–48	1986
CIBSE Guide, Mean radiant temperature in the	M G Davies	11	2	69–71	1990
CIBSE Presidential Address 1986-7	E Kenny	7	3	109–120	1986
CIBSE Technical Memorandum No. 4: CIBSE design notes for the Middle East—Background to forthcoming revision	D W Wood	9	2	41–47	1988
CIBS Example Weather Year for Aberporth		5	3	126–127	1984
CIBS Example Weather Year—Kew 1	K M Letherman & F M Wai	1	3	157–159	1980
CIBS Example Weather Year—Kew 2. Solar and sky radiation intensity	K M Letherman & F M Wai	2	4	165–173	1981
CIBS Example Weather Year—report of the CIBS Weather Year Task Group		4	3	119–124	1983
CIBS Guide, Section A2, Weather and solar data—a review of information in	P Petherbridge & D Ooughton	4	4	147–158	1983
CIBS Guide, Section A9	D Fitzgerald & N Milbank	1	3	134	1980
Correspondence	D Fitzgerald & N Milbank	1	4	214	1980
CIBS Guide, Section A9, Estimation of plant capacity. Supplement A9		4	2	62–66	1983
CIBS Guide: A personal view	M J Holmes	5	4	131–136	1984
CIBS Guide procedures, Room response according to	E Danter	4	2	46–51	1983
Causes and cures, Condensation in terrace housing:	R H Byrd	6	3	109–116	1985
Cavity walls, Thermal performance of,	J B Siviour	3	2	88–89	1982
Central heating systems, Accumulation and separation of gases in	J Jelinek & N R Chapman	1	3	135–139	1980
Central heating system: Spa School field trial, Energy storage in a	R R Cohen, P W O'Callaghan, S D Probert, N M Gibson, D J Nevrala & G F Wright	8	4	79–84	1987
Characteristic s of single and multi-blade dampers for ducted air systems	R C Legg	7	4	129–145	1986
Choice of internal temperature and of heat exchange coefficient h_i, Building heat loss calculations:	J Uyttenbroeck	11	2	49–56	1990
Choice of vapour resistivity values in calculations of condensation risk	K M Letherman	7	1	49–52	1986
Clacton St. John's Primary School—a design study	B King	5	2	63–80	1984
Cladding design of roof structures and glass-covered walls for swimming pool halls, Optimum	K Bloudek	8	1	9–12	1987
Climate, design and user parameters for building heat needs	M G Davies	3	4	181–188	1982
Cold bridging at corners	T Oreszczyn	9	4	167–175	1988
Comfort temperature: Simplified calculation methods, Room heat needs in relation to	M G Davies	11	4	129–139	1990
Commercial boiler plant operations, Use of thermal storage to improve	N M Gibson, J R Pattison & G F Wright	6	4	139–145	1985
Commercial buildings, The consumption of hot water in	P G Jones	3	3	95–109	1982
Errata		3	4	151	1982
Commercial buildings of the Wellington CBD, Analysis of the factors affecting energy use in the	G Baird, M R Donn & F Pool	6	2	67–81	1985
Commercial premises, Selection of gas-fired boiler plant	J R Pattison & V Sharma	1	1	10–16	1980
Comparative performance tests of a domestic hot water system	A T Howarth & M M J Al-Azawi	4	3	113–118	1983
Comparison of variable pitch fans and variable speed fans in a variable air volume system	C M Johnson	9	3	89–98	1988
Component modelling methodology, HVAC optimisation studies:	I Hanby & J A Wright	10	1	35–39	1989
Compressed air, medical, determining the oil content of	J Dyment & G Ludbrook	1	4	207–210	1980
Compressor speed control: Economic evaluation, Variable	A K H Wong & R C Legg	10	1	21–27	1989
Computer-aided analysis of airflow systems noise	T K Willson & A Iqbal	1	1	54–57	1980
Computerised thermal model for buildings, Experimental verificaton of a	J R Waters	1	2	76–82	1980
Computer models of buildings, Empirical validation of dynamic thermal	N T Bowman & K J Lowmas	6	4	153–162	1985
Computers in buildings, building and building research	R N Wright	6	1	21–27	1985
Concrete, Moisture factors and thermal conductivity of	A D Stuckes & A Simpson	7	2	73–77	1986
Concrete: Effect of inclusion shape, Thermal conductivity of vermiculite	A Simpson & A D Stuckes	8	1	1–4	1987

Title	*Author*	*Vol.*	*No.*	*Pages*	*Year*
Condensate from high efficiency gas boilers, disposal of aqueous	G J Hardwick & J R Pattison	5	1	1–5	1984
Condensation: Applicability of conventional vapour permeability values, Interstitial	R C McLean & G H Galbraith	9	1	29–34	1988
Condensation in housing, Portable dehumidifiers for the control of	G H Galbraith, C H Sanders & C Allison	7	1	1–10	1986
Condensation in layered structures: Synthesis of designs	K M Letherman	10	1	29–34	1989
Condensation in roof spaces	R J Oughton	3	1	40–42	1982
Condensation in terrace housing: causes and cures	R H Byrd	6	3	109–116	1985
Condensation model to BREDEM, Condensation risk prediction: Addition of a	D Boyd, P Cooper & T Oreszczyn	9	3	117–125	1988
Condensation risk, Choice of vapour resistivity values in calculations of	K M Letherman	7	1	49–52	1986
Condensation risk prediction: Addition of a condensation model to BREDEM	D Boyd, P Cooper & T Oreszczyn	9	3	117–125	1988
Condensation survey, The Newcastle	G K Preston, C J Stephens & G W Brundrett	2	2	93–99	1981
Condensation within dry lined solid walls, Summer	J R Southern	7	3	101–106	1986
Condensed statistics on the CIBS Example Weather Year—Kew 1	K M Letherman & F M Wai	1	3	157–159	1980
Condensed statistics of the CIBS Example Weather Year—Kew 2. Solar and sky radiation intensity	K M Letherman & F M Wai	2	4	165–173	1981
Conduction processes, Thermal conductivity of porous materials I: Theoretical treatment of	A Simpson & A D Stuckes	7	2	78–86	1986
Constant concentration technique for ventilation measurement in large buildings, Application of the	D W Etheridge & R J Stanway	6	3	129–133	1985
